

Rutland M3 Ink System

M3 Ink Mixing System is an easy to use, highly accurate finished color matching ink mixing system. This system is much more forgiving than a PC based product as it does not require as accurate of measure or base and additives to complete a formula. Most formulas are combinations of M3 colors.

Highlights

- M3 colors directly replace the M2 and EM ink mixing colors.
- M3 inks are opaque resulting in excellent coverage on dark garments.
- The tack free formula allows printing through a range of mesh counts without the need for a viscosity modifier.
- No build-up formulations ensure the highest print efficiencies without down time for wiping screens.
- Mix thousands of finished ink colors by choosing Pantone colors from our IMS 3.0 Ink Mixing Software or by custom mixing your own colors.
- ES0266 NPT Barrier Base available for printing on 100% polyester.

Printing Tips

- Printing on White Garments: Mix per formulation or by eye to achieve brilliant colors on 100% cotton whites.
- For extremely soft-hand prints, mix finished color up to 1:1 with ES0250 NPT Chino Base.
- Printing on Dark Garments or over an underlay: When printing on dark garments, mix per formulation or custom blend to achieve brilliant colors over an underlay.
- Use the NPT Low Bleed White on poly/cotton blends and the ES0266 NPT Barrier Base when printing on 100% polyester.
- Puff designs: Mix 10-15% of NPT Puff Additive to any formulated Color to create a puff ink.

Compliance

- Internationally compliant
- Non-phthalate

Precautions

- The information above is given in good faith and does not release you from testing inks and fabrics to confirm suitability of substrate and application process to meet your customer standards and specifications.

Recommended Parameters

 <p>Fabric Types Cotton</p>	 <p>Flash & Cure Flash: 140-150°F on pre-heated pallets Cure: 320°F</p>	 <p>Clean Up Unused ink will need to be disposed of responsibly. Standard plastisol cleaners, press wash, or ink degradant</p>
 <p>Mesh Counts: 86-305 Tension: 25n/cm³</p>	 <p>Pigment Loading N/A</p>	 <p>Health & Safety Find SDS information here: www.avient.com/resources/safety-data-sheets or contact your local CSR</p>
 <p>Squeegee 70,80 Profile: Square Stroke: 1+ Angle: 15-20%</p>	 <p>Additives Fiberbond EA0001 7.5-15% by weight</p>	<p>2021, Avient Corporation.
