

Rutland C3 Color Booster mixing system is a single pigmented color system with built in binders. Rutland offers a full range of additives to make this versatile and adaptive system a go-to for high output shops that have to maintain strict color matches as well as smaller custom shops that wish to explore print options that will distinguish them from competitors.

Highlights

- No need to worry about pigment overload with these concentrates.
- C3 color boosters may be used at up to 50% in Rutland's NPT bases to mix non-phthalate printing inks.
- C3 Color Boosters directly replace both the EB and CB products.
- Concentrated single pigment primary colors Non-phthalate for mixing environmentally safe plastisol inks.
- Low crock and matte finish when mixed in Rutland NPT HO Matte Base. Use Rutland's NPT VO Base for maximum opacity.

Printing Tips

- Go to <http://p1ims.azurewebsites.net/Account/Login> for color formulas.
- For extremely soft-hand prints, mix finished color (C3 plus base) with up to 1:1 with NPT Chino Base
- Printing on Dark Garments or over an underlay: Mix per formulation or custom blend to achieve brilliant colors over an underlay.
- Use the Rutland NPT Low Bleed White on poly/cotton blends and the NPT Barrier base when printing on 100% polyester.
- Puff designs: Mix 10-15% of Rutland NPT Puff Additive to any formulated Color (C3 plus base) to create a puff ink.
- C3 Colors™, bases, modifiers and additives should be mixed in clean vessels using clean mixer blades and utensils. Any contamination from other ink sources or non-approved additives could make Rutland Colors test positive for the restricted phthalates.

Compliance

- Internationally compliant
- Non-phthalate
