

Rutland™ LC9804 CHILL LC TIDY WHITE

Rutland™ LC9804 Chill LC Tidy White is a high opacity, soft, creamy low bleed and low cure white ink that delivers superior printability over a range of garments. LC9804 has the opacity and brightness to perform admirably in vector stand-alone white graphics but also the ability to hold detail for fine mesh halftone graphics. LC9804 delivers great printability on both manuals and automatic presses.

Highlights

-  High opacity, superior coverage, brilliant white
-  Excellent bleed resistance on poly-blends
-  Low cure, save energy, reduce bleed defects
-  Premium soft hand, drape and fiber-matte down

Printing Tips

-  Stir inks before printing
-  Allows for fast print strokes and easy clearance on fine mesh. Use hard flood and low-medium squeegee pressure
-  LC9804 Chill LC Tidy White is a low bleed and low cure ink. When printing on 100% polyester, cure at 270°F (132°C) and pre-test for bleed resistance. For challenging fabrics*, a bleed blocking underbase such as LC0550 Barrier Grey is required
-  Adjust flash cure temperature and dwell time so ink is just dry to touch. Depending on flash unit, a 2 - 3 second flash is adequate
-  LC9804 is designed to provide maximum opacity on dark fabrics, 100% cotton or cotton/poly blends. It has excellent "low-bleed" qualities

Compliance

-  Non-phthalate
-  Internationally compliant
-  Visit www.rutlandinc.com for more information

Precautions

-  The information provided in this document is given in good faith and does not release you from testing inks and fabrics to confirm suitability of substrate and application process to meet your customer standards and specifications

Recommended Parameters

 <p>Fabric Types Polyblends, triblends, cotton/poly blends, 100% polyester*, 100% cotton</p>	 <p>Flash & Cure Flash: 220°F (105°C) Cure: 270°-320° F (132° -160° C)</p>	 <p>Clean Up Non-phthalate press wash</p>
