PRODUCT INFORMATION BULLETIN

ATHP - READY-FOR-USE POLY LOW BLEED INKS

UNION INK

The ATHP is a polyester low bleed plastisol ink series providing high opacity and an excellent adhesion for 100% polyester athletic uniforms.

Highlights		Printing T	ips	
 Hignlights ATHP ink series are high-opacity, low-bleed plastisols formulated to fight dye migration on the worst bleeding fabrics. ATHP inks allow for the user to print flash print most any ATHP color on most any garment color with out the need for an under base. This ink system cures at 300° F ATHP Series inks are self-under basing. Print/Flash/ Print for best opacity and durability. 		 Direct print low-blee fabrics. Athletic unifor Stencils: Any direct of For the best coverage contact distance and printed fabric rather 	fabrics. Athletic uniforms or any other fabrics prone to dye migration Stencils: Any direct emulsion or capillary film compatible with plastisol inks.For the best coverage, bleed resistance and brightest prints, adjust the off- contact distance and squeegee pressure to print the ink layer on top of the printed fabric rather than pushing the ink entirely through it.	
Compliance		of cure to ensure int	er-flash" this or any plastisol ink. Flash to gel just short er-coat adhesion. come unstable around 230° F, be sure to cool down er successful cure is reached.	
 Non-phthalate Internationally compliant Visit https://www.avientspecialtyinks.com/ services/compliance-support 		will help stabilize the	Avoid "hot stacking" printed poly garments coming off the dryer belt. This will help stabilize the shirt pigment. Poly garments that are allowed to remain warm after exiting the dryer are more susceptible to dye migration.	
Precautions Image: The information above is given in good faith and does not release you from testing inks and fabrics to confirm suitability of substrate and application process to meet your customer standards and specifications. Recommended Parameters
