Los chips de colores presentados en esta Carta de Color son simulaciones de los colores Printop, podrían presentarse ligeras variaciones entre estos chips y las tintas serigráficas reales. Los resultados impresos pueden variar en función de los parámetros de producción, número malla y grosor de hilo, ángulo de impresión, dureza del rasero, metamerismo. Se recomienda antes de usar cualquier tinta serigráfica leer cuidadosamente la hoja técnica del producto y realizar pruebas completas de tono, brillo, adherencia, rasguño y resistencias al frote o solventes.
