UPLC UNIMIX COLOR MIXING **SYSTEM**

Union Ink™ UPLC Unimix is a flexible cure finished ink mixing system that produces Pantone®-simulated colors. UPLC Unimix contains 15 versatile components formulated to create highly-opaque, bright colors.

Highlights Printing Tips Wet-on-wet printing capabilities Color Mixing Instructions: The formulas and instructions for simulating the standard Pantone® colors and the Union Ink standard colors are available after registering on our web page www.avientspecialtvinks.com Accurate and vibrant color matches When printing on dark garments, mix inks per formulation or custom blend Energy savings and extra stability on problematic fabrics to achieve brilliant colors over an underlay Works well on manual or automatic presses U Use 110-230t/in (43-90t/cm) mesh screens for best opacity. Use fine mesh for best wet-on-wet printing Matte finish When printing on fabrics that are prone to ink bleeding, use an underbase with an approved UPLC low bleed white ink and/or a blocker Compliance Sustainability To best protect your garment, control dye migration, and reduce energy consumption when curing, it is recommended to maintain a low oven Non-phthalate temperature, slow belt speed, and recommended cure temperature Internationally compliant Reduced **Energy Use** Test all prints for color fastness and print durability before starting Visit https://www.avientspecialtyinks.com/ services/compliance-support **Precautions** The information above is given in good faith and does not release you from testing inks and fabrics to confirm suitability of substrate and application process to meet your customer standards and specifications

Recommended Parameters

Fabric Types

Cotton, Tri-blends, Cotton/Poly Blends, Polvester

Flash & Cure

Flash: 220°F (105°C) Cure: 270°-320°F (132°-160°C)

Clean Up

Ink degradant or press wash

Mesh

Count: 110-305 t/in (43-120 t/cm)

Tension: 25-35 n/cm2

Pigment Loading

Health & Safety

Find SDS information here: www.avient.com/resources/safety-datasheets or contact your local CSR

Squeegee

Durometer: 60/90/60, 70/90/70, 60-90

Profile: Square, Sharp Stroke: Medium flood. Medium-Fast stroke Angle: 10-15%

Additives

K2912 VISCOSITY BUSTER LC K2920 FINESSE

Stencil

2 over 2

Off Contact: 1/16" (.2cm) Emulsion Over Mesh: 15-20%

Storage

65-90°F (18-32°C) Avoid direct sunlight Use within one year of receipt
