RUTLAND C3 INKS

Rutland C3 Color Booster mixing system is a single pigmented color system with built in binders. Rutland offers a full range of additives to make this versatile and adaptive system a go-to for high output shops that have to maintain strict color matches as well as smaller custom shops that wish to explore print options that will distinguish them from competitors.

Highlights Printing Tips Go to http://plims.azurewebsites.net/Account/Login for color formulas. No need to worry about pigment overload with these concentrates For extremely soft-hand prints, mix finished color (C3 plus Base) with up to C3 color boosters may be used at up to 50% in Rutland's bases to mix non-1:1 with Chino Base phthalate printing inks C3 Color Boosters directly replace both the EB and CB products Printing on Dark Garments or over an underlay: Mix per formulation or custom blend to achieve brilliant colors over an underlay. Concentrated single pigment primary colors Non-phthalate for mixing environmentally safe plastisol inks Use the Rutland Low Bleed White on poly/cotton blends and the ES0266 Low crock and matte finish when mixed in Rutland HO Matte Base. Use Barrier base when printing on 100% polyester. Rutland's VO Base for maximum opacity Puff designs: Mix up to 30% of 2982 FlexiPuff Additive to any formulated Color (C3 plus base) to create a puff ink. C3 Colors™, bases, modifiers and additives should be mixed in clean vessels using clean mixer blades and utensils. Any contamination from other ink Compliance sources or non-approved additives could make Rutland Colors test positive for the restricted phthalates. Non-phthalate Internationally compliant Visit https://www.avientspecialtyinks.com/ services/compliance-support **Precautions** The information above is given in good faith and does not release you from testing inks and fabrics to confirm suitability of substrate and application process to meet your customer standards and specifications.

Recommended Parameters

Fabric Types

Base dependent

Flash & Cure

Flash: 140-150°F on pre-heated pallets

Cure: 320°F

Clean Up

Unused ink will need to be disposed of responsibly. Standard plastisol cleaners, press wash, or ink degradant

Mesh

Count: Base dependent Tension: 18-35n/cm3

Pigment Loading

C3 Pigments

Health & Safety
